

Understanding Energy & Purely Living's View on Crystals by Rita Shimniok, Purely Living

The Tesla video found on the "Fathers of Energy" video on our website has a quote shown at the start of the video, of which the full measure of the quote is not displayed. Tesla stated, "**Crystals are living** beings at the **beginning of creation**. All things have a frequency and a vibration."

I personally would not go so far as to say that a crystal is a "being" as that indicates it has a life-force. That's like saying a rock is alive. I am not sure who quoted Tesla, the original language used (Tesla was Serbian). We know that bible translations vary depending upon Greek or Jewish translation.

However, crystals DO HAVE a frequency or energetic signature. Certain crystals, such as those in the quartz family, have excellent properties to emit/transmit frequencies (aka quartz radio introduced in early 1900s*). This is scientific and not woo-woo.

Everything that God spoke into existence has energy – the energy of the Creator Himself. "God saw everything that He had created and it was very good." Genesis 1:31

Each of us has been SPOKEN into existence by YHWH Himself, and that is the HIGHEST frequency of all. The frequency of God's spoken word generates an information sequence that instructs to form DNA, matter, and ultimately a human being. The same process is used by God to create the horse, the cheetah, songbirds, a river, or a rock – but obviously there are variations as only humans have soul, and only animals have a blood source.

All of God's creation was made for good and He saw that it was good. Lucifer, a Son of God, sought for himself a greater power and position than that which was bestowed on him. He gathered other Sons of God to start an unsuccessful "coup" against God – and he lost.

From that point on Lucifer, not human, has powers of darkness. Lucifer made it his mission to take all that God made good and twist it. An example is taking the rocks, minerals, crystals that YHWH created and bringing them into practices of mystic and witchcraft. That does not make God's creation itself bad, but the purpose for which they are used are of Satan, dark spirit, and not of God.

It is much like the saying, "Love the sinner, not the sin." Crystals are God's creation, but we are to use caution as Believers not to be deceived into thinking that they have special powers. It is my belief as a Believer in Christ that crystals do not have healing powers. They have properties unique to their individual mineral and make up, but only Jesus, the Messiah, has the power to heal. Healing manifests in spiritual, emotional and physical as bestowed upon us by the Trinity.

Granted some of you will disagree with me. You may have your book of crystals that state otherwise. I like crystals – I think they are pretty. I utilize some for decoration, especially if they contain green, blue or teal – my favorite colors. Some sparkle and glitter in sunlight – but not for a moment do I associate a power with them.

As a bio-energetics practitioner I utilize crystals solely for their scientific properties that absorb and emit frequencies. Quartz "does it best" – with a long holding power, but just about anything can be imprinted with a frequency or signature – such as a patch or homeopathic melt-away pellets.
